Section #1 General Course Information

Department: Sciences

Submitter

First Name: **Jennifer**

Last Name: **Bown**

Phone: **3348**

Email: **jenb**

Course Prefix and Number: BI - 165CL

Credits: 1

Contact hours

Lecture (# of hours):

Lec/lab (# of hours):

Lab (# of hours): 33

Total course hours: 33

For each credit, the student will be expected to spend, on average, 3 hours per week in combination of in-class and out-of-class activity.

Course Title: Natural History of the Oregon Coast (Lab)

Course Description:

A lab to accompany the BI-165C Natural History of the Oregon Coast, lecture. Field trips and lab exercises focus on oceanography, plants, animals, geology, and environmental issues of the Oregon coast.

Type of Course: Lower Division Collegiate

Is this class challengeable?

No

Can this course be repeated for credit in a degree?

No

Is general education certification being sought at this time?

Yes

Check which General Education requirement:

✓ Science & Computer Science

Is this course part of an AAS or related certificate of completion?

No

Are there prerequisites to this course?

No

Are there corequisites to this course?

Yes

Co-reqs: BI-165C

Are there any requirements or recommendations for students taken this course?

No

Are there similar courses existing in other programs or disciplines at CCC?

No

Will this class use library resources?

Yes

Have you talked with a librarian regarding that impact?

No

Is there any other potential impact on another department?

No

Does this course belong on the Related Instruction list?

No

GRADING METHOD:

A-F or Pass/No Pass

Audit: Yes

When do you plan to offer this course?

✓ **Not every year**

Is this course equivalent to another?

If yes, they must have the same description and outcomes.

No

Will this course appear in the college catalog?

Yes

Will this course appear in the schedule?

Yes

Student Learning Outcomes:

Upon successful completion of this course, students should be able to:

1. Describe the scientific method and utilize scientific tools and procedures in solving scientific questions that pertain to coastal ecosystems (SC1), (SC2), (SC3)
 2. Diagram and describe geologic features and formations found along coastlines
 3. List and discuss the various coastal environmental hazards including flooding, earthquakes, and tsunamis
 4. Identify the aspects of oceanography which affect coastlines (SC1), (SC2), (SC3)
 5. Define and discuss estuaries, their formation, categorization along with abiotic and biotic features and human impacts on them
 6. Distinguish between different intertidal ecosystems and present several factors that contribute to their biodiversity
 7. Recognize the general features of coastal beaches and sand dunes
 8. List the features of a coastal old growth forests and identify different symbiotic relationships within them
 9. Compare and contrast the traits and adaptations of marine mammals and marine birds to life in the marine environment
-

**AAOT/ASOT GENERAL EDUCATION OUTCOMES
COURSE OUTLINE MAPPING CHART**

Mark outcomes addressed by the course:

- Mark "C" if this course completely addresses the outcome. Students who successfully complete this course are likely to have attained this learning outcome.
- Mark "S" if this course substantially addresses the outcome. More than one course is required for the outcome to be completely addressed. Students who successfully complete all of the required courses are likely to have attained this learning outcome.
- Mark "P" if this course partially addresses the outcome. Students will have been exposed to the outcome as part of the class, but the class is not a primary means for attaining the outcome and assessment for general education purposes may not be necessary.

As a result of completing the AAOT/ASOT general education requirements, students will be able to:

WR: Writing Outcomes

- P**
1. Read actively, think critically, and write purposefully and capably for academic and, in some cases, professional audiences.
 2. Locate, evaluate, and ethically utilize information to communicate effectively.
 3. Demonstrate appropriate reasoning in response to complex issues.

SP: Speech/Oral Communication Outcomes

1. Engage in ethical communication processes that accomplish goals.
2. Respond to the needs of diverse audiences and contexts.
3. Build and manage relationships.

MA: Mathematics Outcomes:

- P**
1. Use appropriate mathematics to solve problems.
- P**
2. Recognize which mathematical concepts are applicable to a scenario, apply appropriate mathematics and technology in its analysis, and then accurately interpret, validate, and communicate the results.

AL: Arts and Letters Outcomes

1. Interpret and engage in the Arts & Letters, making use of the creative process to enrich the quality of life.
2. Critically analyze values and ethics within range of human experience and expression to engage more fully in local and global issues.

SS: Social Science Outcomes

1. Apply analytical skills to social phenomena in order to understand human behavior.
2. Apply knowledge and experience to foster personal growth and better appreciate the diverse social world in which we live.

SC: Science or Computer Science Outcomes

- S**
1. Gather, comprehend, and communicate scientific and technical information in order to explore ideas, models, and solutions and generate further questions.
- S**
2. Apply scientific and technical modes of inquiry, individually, and collaboratively, to critically examine the influence of scientific and technical knowledge on human society and the environment.

S

3. Assess the strengths and weaknesses of scientific studies and critically examine the influence of scientific and technical knowledge on human society and the environment.

CL: Cultural Literacy Outcome

1. Identify and analyze complex practices, values, and beliefs and the culturally and historically defined meanings of difference.

Outcomes Assessment Strategies:

- ✓ **Projects**
- ✓ **Writing Assignments**

✓ **Thesis/Research Project**

✓ **Journal Writing**

:

Major Topic Outline:

1. Coastal Structure: Plate tectonics, coastal morphology and geologic processes, historical geology of the Northwest Coast and Coast Range.
2. Environmental geology and hazards of the coast.
3. Oceanography: currents, stratification, upwelling, biologic structure of marine water.
4. Estuaries: structure, dynamics, ecological importance and degradation, environmental problems: lake eutrophication, siltation, pollution, land development.
5. Intertidal and tide pool Ecology: structure, energy flow, basic life cycles, role of algae.
6. Intertidal and tide pool Ecology: ecological adaptations, distribution of organisms (zonation), dominant plant and animal communities.
7. Coastal Dunes: dune structure and succession, forest types, structure and succession.
8. Forest Ecology: structure and kinds, forest nutrients and cycling, bryophytes, symbiotic relationships.
9. Biological adaptations to marine survival in mammals and birds.
10. Coastal Marine mammals: whales, Pinnipeds, history, natural history and current status.
11. Coastal birds: common birds, seasonal variation, nesting areas, sea bird community structure, nesting ecology, migration patterns, unique and rare bird status, birding areas.

Does the content of this class relate to job skills in any of the following areas:

- | | |
|--------------------------------------|-----------|
| 1. Increased energy efficiency | No |
| 2. Produce renewable energy | No |
| 3. Prevent environmental degradation | No |
| 4. Clean up natural environment | No |
| 5. Supports green services | No |

Percent of course: 0%

Section #2 Course Transferability

Concern over students taking many courses that do not have a high transfer value has led to increasing attention to the transferability of LDC courses. The state currently requires us to certify that at least one OUS school will accept a new LDC course in transfer. Faculty should communicate with colleagues at one or more OUS schools to ascertain how the course will transfer by answering these questions.

1. Is there an equivalent lower division course at the University?
2. Will a department accept the course for its major or minor requirements?

3. Will the course be accepted as part of the University's distribution requirements?

If a course transfers as an elective only, it may still be accepted or approved as an LDC course, depending on the nature of the course, though it will likely not be eligible for Gen Ed status.

Which OUS schools will the course transfer to? (Check all that apply)

PSU (Portland State University)

OSU (Oregon State University) **UO (University of Oregon)**

Identify comparable course(s) at OUS school(s)

BI-LDT, BI-1ALT

How does it transfer? (Check all that apply)

general elective

:

Provide evidence of transferability: (minimum one, more preferred)

Other. Please explain.
