Section #1 General Course Information

Department: Manufacturing

Submitter

First Name: **Jim**

Last Name: **Stager**

Phone: **3855**

Email: **jims**

Course Prefix and Number: EET - 127

Credits: 4

Contact hours

Lecture (# of hours):

Lec/lab (# of hours): 88

Lab (# of hours):

Total course hours: 88

For each credit, the student will be expected to spend, on average, 3 hours per week in combination of in-class and out-of-class activity.

Course Title: Semiconductor Circuits I

Course Description:

Introduction to the basic concepts of semiconductor devices and the fundamental principles of the device operation. Industry standard devices will be used. Hands on with diodes, Zeners, LEDs, transistors, and operational amplifier IC circuitry.

Type of Course: Career Technical Preparatory

Is this class challengeable?

Yes

Can this course be repeated for credit in a degree?

No

Is general education certification being sought at this time?

No

Does this course map to any general education outcome(s)?

No

Is this course part of an AAS or related certificate of completion?

Yes

Name of degree(s) and/or certificate(s): Electronics Engineering Technology programs

Are there prerequisites to this course?

Yes

Pre-reqs: EET-137

Have you consulted with the appropriate chair if the pre-req is in another program?

No

Are there corequisites to this course?

No

Are there any requirements or recommendations for students taken this course?

No

Are there similar courses existing in other programs or disciplines at CCC?

No

Will this class use library resources?

Yes

Have you talked with a librarian regarding that impact?

No

Is there any other potential impact on another department?

No

Does this course belong on the Related Instruction list?

No

GRADING METHOD:

A-F or Pass/No Pass

Audit: Yes

When do you plan to offer this course?

✓ **Spring**

Is this course equivalent to another?

If yes, they must have the same description and outcomes.

No

Will this course appear in the college catalog?

Yes

Will this course appear in the schedule?

Yes

Student Learning Outcomes:

Upon successful completion of this course, students should be able to:

1. demonstrate an ability to calculate and solve equations for various parameters that determine the circuit's operation,
2. assemble (prototype bread board) circuits,
3. demonstrate an ability to measure circuit's actual values and compare with calculated,
4. exhibit the ability to troubleshoot and improve desired circuit performance,
5. construct circuits using various components such as: resistors, diodes, transistors, LED's, operational amplifier;
6. demonstrate the proper use of the Oscilloscope, Digital multi-meter, Bench power supplies and Function generators during the lab exercises.

This course does not include assessable General Education outcomes.

Major Topic Outline:

1. Semiconductor diodes, Light Emitting Diodes, Zener Diodes.
2. AC to DC power supply.
3. Bipolar Junction Transistors.
4. Field-Effect transistors.
5. Discrete Amplifier circuits.
6. Operational Amplifier.

Does the content of this class relate to job skills in any of the following areas:

- | | |
|--------------------------------------|-----------|
| 1. Increased energy efficiency | No |
| 2. Produce renewable energy | No |
| 3. Prevent environmental degradation | No |
| 4. Clean up natural environment | No |
| 5. Supports green services | No |

Percent of course: 0%

First term to be offered:
