Section #1 General Course Information

Department: Manufacturing

Submitter

First Name: Wayne
Last Name: Sellevaag
Phone: 3841
Email: waynes

Course Prefix and Number: EET - 254

 # Credits: 4

Contact hours

Lecture (# of hours):
Lec/lab (# of hours): 88
Lab (# of hours):
Total course hours: 88

For each credit, the student will be expected to spend, on average, 3 hours per week in combination of in-class and out-of-class activity.

Course Title: Introduction to Microcontrollers

Course Description:

Introduction to processor architecture and microcontrollers. Internal structure, registers, busses, control unit. Clock, machine and instruction cycling timing, interrupts and DMA. Instruction set, mnemonics, functions, and assembly language programming. Interfacing to external memory and I/O on-chip peripherals.

Type of Course: Career Technical Preparatory

Is this class challengeable?

Yes

Can this course be repeated for credit in a degree?

No

Is general education certification being sought at this time?

No

Does this course map to any general education outcome(s)?

No

Is this course part of an AAS or related certificate of completion?

Yes

Name of degree(s) and/or certificate(s): Electronics Engineering Technology programs

Are there prerequisites to this course?

Yes

Pre-reqs: EET-157

Have you consulted with the appropriate chair if the pre-req is in another program?

No

Are there corequisites to this course?

No

Are there any requirements or recommendations for students taken this course?

Yes

Recommendations: Completion of EET-257

Requirements: None

Are there similar courses existing in other programs or disciplines at CCC?

No

Will this class use library resources?

Yes

Have you talked with a librarian regarding that impact?

No

Is there any other potential impact on another department?

No

Does this course belong on the Related Instruction list?

No

GRADING METHOD:

A-F or Pass/No Pass

Audit: Yes

When do you plan to offer this course?

✓ **Winter**

Is this course equivalent to another?

If yes, they must have the same description and outcomes.

No

Will this course appear in the college catalog?

Yes

Will this course appear in the schedule?

Yes

Student Learning Outcomes:

Upon successful completion of this course, students should be able to:

1. demonstrate the operation of a micro-controller,
2. summarize internal structure, registers, busses, control units;
3. summarize clock, machine and instruction cycle timing, interrupts and DMA;
4. summarize instruction set, mnemonics, functions, and assembly language programming;
5. summarize interfacing to external memory and I/O on-chip peripherals.

This course does not include assessable General Education outcomes.

Major Topic Outline:

1. Internal structure, registers, busses, control unit.
2. Clock, machine and instruction cycle timing, interrupts and DMA.
3. Instruction set, mnemonics, functions, and assembly language programming.
4. Interfacing to external memory and I/O on-chip peripherals.

Does the content of this class relate to job skills in any of the following areas:

1. Increased energy efficiency   **No**
2. Produce renewable energy   **No**
3. Prevent environmental degradation   **No**
4. Clean up natural environment   **No**
5. Supports green services   **No**

Percent of course: 0%

First term to be offered:
