Section #1 General Course Information

Department: Business & Computer Science: Computer Science

Submitter

First Name: Rich
Last Name: Albers
Phone: 3166
Email: richa

Course Prefix and Number: CS - 151

Credits: 4

Contact hours

Lecture (# of hours): 22 Lec/lab (# of hours): 44

Lab (# of hours):

Total course hours: 66

For each credit, the student will be expected to spend, on average, 3 hours per week in combination of in-class and out-of-class activity.

Course Title: Networking I

Course Description:

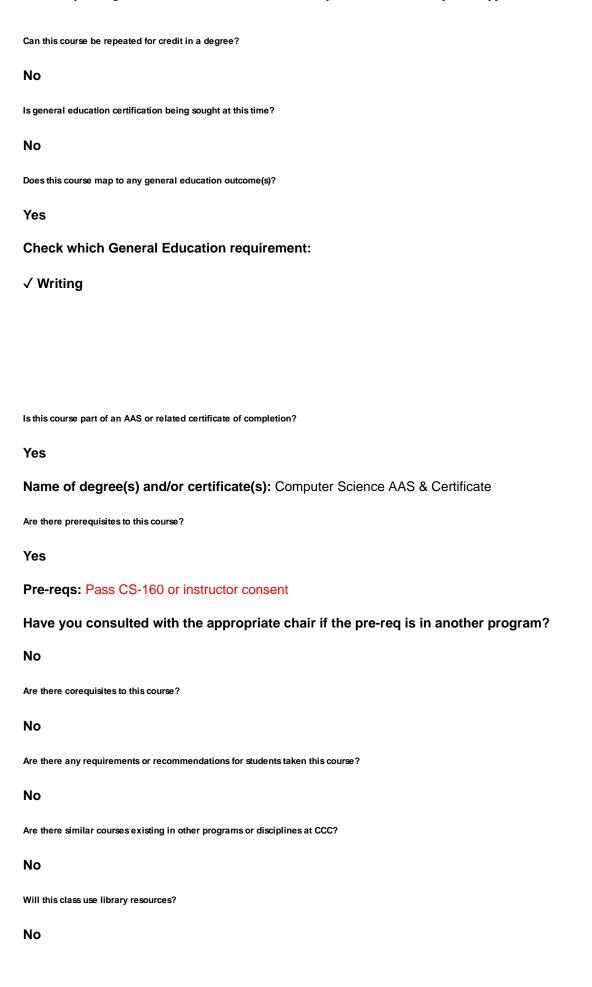

This course introduces the architecture, structure, functions, components, and models of the Internet and other computer networks. The principles and structure of IP addressing and the fundamentals of Ethernet concepts, media, and operations are introduced to provide a foundation for the curriculum. By the end of the course, students will be able to build simple LANs, perform basic configurations for routers and switches, and implement IP addressing schemes. This course, along with CS152, cover the topics on the CISCO CCENT exam.

Type of Course: Lower Division Collegiate

Is this class challengeable?

Yes

1 of 6 6/2/2016 1:17 PM

2 of 6 6/2/2016 1:17 PM

Is there any other potential impact on another department? No Does this course belong on the Related Instruction list? No **GRADING METHOD:** A-F or Pass/No Pass Audit: Yes When do you plan to offer this course? √ Winter Is this course equivalent to another? If yes, they must have the same description and outcomes. No Will this course appear in the college catalog? Yes Will this course appear in the schedule? Yes **Student Learning Outcomes:** Upon successful completion of this course, students should be able to: describe the devices and services used to support communications in data networks and the Internet, 2. describe the role of protocol layers in data networks, 3. describe the importance of addressing and naming schemes at various layers of data networks in IPv4 and IPv6 environments, 4. design, calculate, and apply subnet masks and addresses to fulfill given requirements in IPv4 and IPv6 networks, 5. explain fundamental Ethernet concepts such as media, services, and operations, 6. build a simple Ethernet network using routers and switches,

3 of 6

7. use Cisco command-line interface (CLI) commands to perform basic router and switch configurations,

8. utilize common network utilities to verify small network operations and analyze data traffic.

COURSE OUTLINE MAPPING CHART

Mark outcomes addressed by the course:

- Mark "C" if this course completely addresses the outcome. Students who successfully complete this course are likely to have attained this learning outcome.
- Mark "S" if this course substantially addresses the outcome. More than one course is required for the
 outcome to be completely addressed. Students who successfully complete all of the required courses are
 likely to have attained this learning outcome.
- Mark "P" if this course partially addresses the outcome. Students will have been exposed to the outcome as
 part of the class, but the class is not a primary means for attaining the outcome and assessment for general
 education purposes may not be necessary.

As a result of completing the AAOT/ASOT general education requirements, students will be able to:

WR: Writing Outcomes

- 1. Read actively, think critically, and write purposefully and capably for academic and, in some cases, professional audiences.
- P 2. Locate, evaluate, and ethically utilize information to communicate effectively.
 - 3. Demonstrate appropriate reasoning in response to complex issues.

SP: Speech/Oral Communication Outcomes

- 1. Engage in ethical communication processes that accomplish goals.
- 2. Respond to the needs of diverse audiences and contexts.
- 3. Build and manage relationships.

MA: Mathematics Outcomes:

- 1. Use appropriate mathematics to solve problems.
- 2. Recognize which mathematical concepts are applicable to a scenario, apply appropriate mathematics and technology in its analysis, and then accurately interpret, validate, and communicate the results.

AL: Arts and Letters Outcomes

- 1. Interpret and engage in the Arts & Letters, making use of the creative process to enrich the quality of life.
- 2. Critically analyze values and ethics within range of human experience and expression to engage more fully in local and global issues.

SS: Social Science Outcomes

- 1. Apply analytical skills to social phenomena in order to understand human behavior.
- 2. Apply knowledge and experience to foster personal growth and better appreciate the diverse social world in which we live.

SC: Science or Computer Science Outcomes

1. Gather, comprehend, and communicate scientific and technical information in order to explore ideas, models, and solutions and generate further questions.

4 of 6

- 2. Apply scientific and technical modes of inquiry, individually, and collaboratively, to critically examine the influence of scientific and technical knowledge on human society and the environment.
- 3. Assess the strengths and weaknesses of scientific studies and critically examine the influence of scientific and technical knowledge on human society and the environment.

Outcomes Assessment Strategies:

.

Major Topic Outline:

- 1. Exploring the Network
- 2. Configuring a Network Operating System
- 3. Network Protocols and Communications
- 4. Network Access
- 5. Ethernet
- 6. Network Layer
- 7. Transport Layer
- 8. IP Addressing
- 9. Subnetting IP Networks
- 10. Application Layer
- 11. Build a Business Network

Does the content of this class relate to job skills in any of the following areas:

Increased energy efficiency
 Produce renewable energy
 Prevent environmental degradation
 Clean up natural environment
 Supports green services

Percent of course: 0%

Section #2 Course Transferability

Concern over students taking many courses that do not have a high transfer value has led to increasing attention to the transferability of LDC courses. The state currently requires us to certify that at least one OUS school will accept a new LDC course in transfer. Faculty should communicate with colleagues at one or more OUS schools to ascertain how the course will transfer by answering these questions.

- 1. Is there an equivalent lower division course at the University?
- 2. Will a department accept the course for its major or minor requirements?
- 3. Will the course be accepted as part of the University's distribution requirements?

5 of 6

Next available term after approval

If a course transfers as an elective only, it may still be accepted or approved as an LDC course, depending on the nature of the course, though it will likely not be eligible for Gen Ed status.

Which OUS schools will the course transfer to? (Check all that apply)

Identify comparable course(s) at OUS school(s)

How does it transfer? (Check all that apply)

:

Provide evidence of transferability: (minimum one, more preferred)
