**Section #1 General Course Information****Department:** Business & Computer Science: Computer Science**Submitter**

First Name: Debra

Last Name: Carino

Phone: 3170

Email: dcarino

---

**Course Prefix and Number:** CS - 275

---

**# Credits:** 3**Contact hours**

Lecture (# of hours): 33

Lec/lab (# of hours):

Lab (# of hours):

Total course hours: 33

For each credit, the student will be expected to spend, on average, 3 hours per week in combination of in-class and out-of-class activity.

---

**Course Title:** Database Design**Course Description:**

Focuses on design of a relational database management systems (RDMS). Topics will include database development using the a) requirement, b) design, c) implementation model, database theory from flat table design to relational systems, entity-relationship models, one-to-one, one-to-many, and many-to-many relationships, referential integrity, normalization of tables, database programming and querying with SQL, and database security. Although other platforms may be demonstrated, the majority of work will be done with MySQL Server.

---

**Type of Course:** Lower Division Collegiate

Is this class challengeable?

**Yes**

Can this course be repeated for credit in a degree?

**No**

Is general education certification being sought at this time?

**No**

Does this course map to any general education outcome(s)?

**Yes**

**Check which General Education requirement:**

✓ **Writing**

✓ **Mathematics**

Is this course part of an AAS or related certificate of completion?

**Yes**

**Name of degree(s) and/or certificate(s):** Computer & Network Administration AAS & Certificate; Computer Application Support AAS & Certificate; Web Design Certificate; Web Design & Development AAS

Are there prerequisites to this course?

**No**

Are there corequisites to this course?

**No**

Are there any requirements or recommendations for students taken this course?

**Yes**

**Recommendations:**

**Requirements:** Computer literacy: file management, fluency with a current Windows OS, familiarity with virtual machines

Are there similar courses existing in other programs or disciplines at CCC?

**No**

Will this class use library resources?

**Yes**

**Have you talked with a librarian regarding that impact?**

**No**

Is there any other potential impact on another department?

**No**

Does this course belong on the Related Instruction list?

**No**

**GRADING METHOD:**

A-F or Pass/No Pass

**Audit: Yes**

When do you plan to offer this course?

✓ **Winter**

Is this course equivalent to another?

If yes, they must have the same description and outcomes.

**No**

Will this course appear in the college catalog?

**Yes**

Will this course appear in the schedule?

**Yes****Student Learning Outcomes:**

Upon successful completion of this course, students should be able to:

1. define common database terminology, including but not limited to: entities, entity sets, tuples, relationships, cardinality and modality of relationships, tables, keys, fields, records;
  2. define and apply the first three normal forms;
  3. create entity relationship diagrams (ERDs) up to the 3rd normal form when provided with a case study or needs analysis;
  4. use SQL statements create and interact with database objects, as well as for a variety of database queries, including multi-table queries, queries using statistical functions, and nested queries;
  5. explain the significance of security in database administration and describe best practice for creating users and assigning permissions;
  6. build a flexible, normalized, and secure database from an initial needs analysis to finished product.
-

**AAOT/ASOT GENERAL EDUCATION OUTCOMES****COURSE OUTLINE MAPPING CHART****Mark outcomes addressed by the course:**

- Mark "C" if this course completely addresses the outcome. Students who successfully complete this course are likely to have attained this learning outcome.
- Mark "S" if this course substantially addresses the outcome. More than one course is required for the outcome to be completely addressed. Students who successfully complete all of the required courses are likely to have attained this learning outcome.
- Mark "P" if this course partially addresses the outcome. Students will have been exposed to the outcome as part of the class, but the class is not a primary means for attaining the outcome and assessment for general education purposes may not be necessary.

**As a result of completing the AAOT/ASOT general education requirements, students will be able to:****WR: Writing Outcomes**

1. Read actively, think critically, and write purposefully and capably for academic and, in some cases, professional audiences.

**P** 2. Locate, evaluate, and ethically utilize information to communicate effectively.

**P** 3. Demonstrate appropriate reasoning in response to complex issues.

**SP: Speech/Oral Communication Outcomes**

1. Engage in ethical communication processes that accomplish goals.

2. Respond to the needs of diverse audiences and contexts.

3. Build and manage relationships.

**MA: Mathematics Outcomes:**

**P** 1. Use appropriate mathematics to solve problems.

2. Recognize which mathematical concepts are applicable to a scenario, apply appropriate mathematics and technology in its analysis, and then accurately interpret, validate, and communicate the results.

**AL: Arts and Letters Outcomes**

1. Interpret and engage in the Arts & Letters, making use of the creative process to enrich the quality of life.

2. Critically analyze values and ethics within range of human experience and expression to engage more fully in local and global issues.

**SS: Social Science Outcomes**

1. Apply analytical skills to social phenomena in order to understand human behavior.

2. Apply knowledge and experience to foster personal growth and better appreciate the diverse social world in which we live.

**SC: Science or Computer Science Outcomes**

1. Gather, comprehend, and communicate scientific and technical information in order to explore ideas, models, and solutions and generate further questions.

2. Apply scientific and technical modes of inquiry, individually, and collaboratively, to critically examine the influence of scientific and technical knowledge on human society and the environment.

3. Assess the strengths and weaknesses of scientific studies and critically examine the influence of scientific and technical knowledge on human society and the environment.

**Outcomes Assessment Strategies:**

:

**Major Topic Outline:**

1. Introduction to databases.
  - a. Flat file vs relational database design.
  - b. Creating the development environment.
  - c. Introduction to SQL & the MySQL monitor.
2. Data modeling.
  - a. Needs analysis.
  - b. Entities, relationships, primary & foreign keys.
  - c. Entity relationship diagrams.
    - c1. Using Chen's notation.
    - c2. Using Crow's-Foot notation.
3. Normalization.
  - a. 1NF-5NF.
  - b. How's and why's of creating "un-normalized" tables.
4. Creating & modifying database structures.
  - a. Using CREATE statements.
  - b. Data types.
  - c. Assigning primary and foreign keys.
  - d. Importing and INSERTing data.
5. Querying.
  - a. Basic SELECT statements.
  - b. Using accumulating functions and aliases.
  - c. Using nested SELECT statements.
  - d. Querying multiple tables.
6. Database security.
  - a. Overview.
  - b. Users.
  - c. Privileges.

Does the content of this class relate to job skills in any of the following areas:

- |                                      |           |
|--------------------------------------|-----------|
| 1. Increased energy efficiency       | <b>No</b> |
| 2. Produce renewable energy          | <b>No</b> |
| 3. Prevent environmental degradation | <b>No</b> |
| 4. Clean up natural environment      | <b>No</b> |
| 5. Supports green services           | <b>No</b> |

**Section #2 Course Transferability**

Concern over students taking many courses that do not have a high transfer value has led to increasing attention to the transferability of LDC courses. The state currently requires us to certify that at least one OUS school will accept a new LDC course in transfer. Faculty should communicate with colleagues at one or more OUS schools to ascertain how the course will transfer by answering these questions.

1. Is there an equivalent lower division course at the University?
2. Will a department accept the course for its major or minor requirements?
3. Will the course be accepted as part of the University's distribution requirements?

If a course transfers as an elective only, it may still be accepted or approved as an LDC course, depending on the nature of the course, though it will likely not be eligible for Gen Ed status.

Which OUS schools will the course transfer to? (Check all that apply)

Identify comparable course(s) at OUS school(s)

How does it transfer? (Check all that apply)

:

Provide evidence of transferability: (minimum one, more preferred)

First term to be offered:

**Next available term after approval**
