

## Informational Item 1

NWCCU accreditation standard 2.C.6 states:

- 2.C.6 Faculty with teaching responsibilities, in partnership with library and information resources personnel, ensure that the use of library and information resources is integrated into the learning process.

On the Curriculum Committee course outlines page Librarians looked at 1,122 course outlines in 94 departments.

Rules of Thumb

1. Courses of at least 3 credits or more,
2. Except CWE,
3. Courses at least 100 level or better.

To the question about Library Use, 33 course outlines responded YES.

To the question about Library Use, 1,088 responded NO (including the library ☺)

That's about 2.9% of the course outlines. ☹

The library believes that number may be inaccurate.

During Winter and Spring Quarters the library would like to visit College Council, Faculty Senate and Department meetings to promote updating course outlines so that Clackamas can demonstrate that, "...library and information resources are integrated into the learning process." ☺

## **Information Item 2**

As I looked through the course outlines another interesting fact jumped out at me:

Of the first 1000 course outlines about 50 percent show Kelly Steigleder as the originator.

Once again, I think that may be inaccurate.

While stumping for departments to update the library question I could encourage them to update the originator question also.
