

Clackamas Community College strives to address, explore, respond to, and educate our community about the diversity of human experience.

We create an inclusive, culturally competent, and supportive environment where staff, faculty, students and administration model the behavior we desire for our community.

We work to prepare our students to successfully understand people with diverse perspectives and backgrounds in their lives as citizens and employees, and we teach better critical thinking, empathy, and understanding of others.

Diversity Task Force

Diversity Mission Statement
