

ISP 471

Courses repeatable for additional credit

PURPOSE

Defines the conditions which allow a student to repeat a course for additional credit towards degree completion.

SUMMARY

Students may repeat a course as often as they wish. However, only in certain circumstances may credits from a repeated course be applied towards degree completion.

STANDARD

1. Certain classes may be repeated for additional credit towards degree completion as specified in the catalog.
2. When repeated for additional credit, such courses are non-challengeable.
3. Variable credit courses may be repeated and credits applied to degree completion only up to the number of credits allowed for the class.
4. CWE courses may be repeated and credits applied. Specific procedures, limitations, and conditions are specified in ISP 390 in this manual.

(NOTE: See ISP 471A for a list of courses that are repeatable for additional credit.)
